

TechMart Electronics — Hardware Setup & Quick-Start Installation Guide

Official Corporate Policy & Reference Documentation | Doc ID: TM-IG-QUICKSTART-2026

1. TechMart SmartHub Pro Setup Steps

Follow these step-by-step instructions to initialize your SmartHub Pro in under 5 minutes.

- Step 1 (Placement): Place the SmartHub Pro in a central, elevated location in your home, at least 3 feet away from large metal objects or microwaves.
- Step 2 (Power): Connect the included 12V power adapter. The OLED display will illuminate and show the TechMart logo.
- Step 3 (App Pairing): Open the TechMart App on iOS/Android. Ensure Bluetooth is enabled on your phone and tap 'Add New Device (+)' in the top right corner.
- Step 4 (Network Selection): Select your 2.4 GHz or 5 GHz Wi-Fi network and enter the passphrase. The front LED will turn Solid Blue when connected.
- Step 5 (Matter/Zigbee Discovery): Put your smart accessories in pairing mode; the SmartHub Pro will automatically detect and bind them.

2. TechMart SoundWave 500 Bluetooth & Wi-Fi Pairing

- Bluetooth Mode: Power on the speaker. Press and hold the Bluetooth button for 3 seconds until the blue LED flashes rapidly. Select 'SoundWave 500' on your mobile device.
- Stereo Pair Mode: To link two SoundWave 500 speakers for true Left/Right stereo audio, double-tap the 'Link' button on both units simultaneously within 10 seconds.
- Auxiliary Input: Plug a 3.5mm audio cable into the AUX port; the speaker switches to Aux mode automatically.

3. TechMart VisionStream 4K TV Connection

- Step 1: Plug the HDMI 2.1 cable into the HDMI 1 / eARC port of your 4K television.
- Step 2: Connect the USB-C power supply directly into a wall outlet (avoid low-power TV USB ports).
- Step 3: Switch TV source to the corresponding HDMI input and follow on-screen remote pairing (hold Home + Back for 5 seconds).
